NEUROTRAX INSTRUCTIONS

The **NeuroTrax** testing is administered by a trained technician and will assist you throughout the testing session.

1. You will need to bring your eyeglasses if you require them for reading.
2. If English is your second language and you need assistance with reading instructions please notify the receptionist at the time of the appointment so that we may allot ample time for the technician to assist you with the testing session.
3. We recommend that all cell phones be either turned off or put on silent during the testing session, as they will be disruptive, thank you.

The testing sessions are between 40 to 75 minutes in length. There may be times when sessions will run longer depending on the patient's condition.

For patients without insurance, payment is required the day of testing unless prior payment arrangements have been made in advance.

Patients are responsible for any co-pay, deductible and/or co-insurance.

PLEASE ARRIVE TIMELY TO YOUR APPOINTMENT

Procedure Codes: 96119, 96102, 96116
