NeuroTrax Information

NeuroTrax is a cloud-based computer examination used to assess cognition, including memory. The test does NOT require specific computer skills. It is administered by our staff who will assist you throughout the testing session.

The testing sessions are between 40 to 75 minutes in length. There may be times when testing sessions run longer depending on the patient's condition.

PREPARTION FOR THE PROCEDURE

1. There are no dietary, medication, or physical activity restrictions. You may continue normal activities before and after the test.
2. Please bring your eyeglasses and hearing aids.
3. If English is your second language and you need assistance with reading instructions, please notify the receptionist at the time of booking so that we may schedule ample time for our staff to assist you with the testing session.
4. You will want to take the examination without interruptions. We recommend that all cell phones be either turned off or put on silent. Please arrange for child care.
